Farid Bagheri

GENAI & AGENTIC AI ENGINEER | LLMs · RAG · AI Agents · Knowledge Graphs · AI Evaluation

farid.bagheri89@gmail.com +33749505053 Paris, France Portfolio GitHub LinkedIn Google Scholar

Summary

PhD AI Engineer specializing in LLMs, agentic AI, RAG and knowledge-enhanced systems. Experienced in designing multi-model LLM pipelines, auditable evaluation workflows, semantic retrieval systems and knowledge-graph-based AI using Python, PyTorch, Hugging Face and LangChain. Built and evaluated scalable AI systems for real-world data and engineering-oriented workflows, combining research rigor with prior manufacturing quality and data-analysis experience.

Experience

Université Gustave Eiffel — France

Graduate Lecturer — Sep 2026 – Present

- Teaching Master 2 courses Advanced Data Analysis & Statistical Learning and Deep Learning, with hands-on Python programming, machine learning implementation, model evaluation, neural networks and Transformer-based applications.

Mercor — Remote

Generative AI | LLM Evaluation Engineer — 2025 – Sep 2026

- Evaluate LLM outputs for factuality, reasoning quality, relevance, and instruction adherence.
- Identify hallucinations and failure patterns through structured, evidence-based analysis.
- Design prompts and evaluation rubrics to improve LLM reliability and response quality.

Sorbonne Paris Nord University — France

Graduate Lecturer — 2024 – Sep 2026

- Teaching Master 2 courses NLP, Knowledge Graphs, Machine Learning & Deep Learning courses

Sorbonne Paris Nord University (LIPN) — France

Research Associate | LLMs, Agents & Knowledge-Enhanced AI — 2023 – Sep 2026

- Design modular agentic-AI workflows with multi-model producer/judge architectures, structured JSON outputs, deterministic post-processing and auditable intermediate artifacts.
- Develop knowledge-enhanced retrieval and semantic-matching workflows using LLMs, knowledge graphs, SBERT, TF-IDF, graph embeddings and hybrid reranking/similarity methods.
- Benchmark multiple LLM families for output quality, robustness and downstream retrieval performance using automated and task-specific evaluation metrics.
- Build reproducible experiments on a real-world corpus of 663 submissions and 524 expert profiles sourced from linked structured and unstructured data.

University of Cagliari — Italy

PhD Researcher | Artificial Intelligence — 2022 – Feb 2026

- Developed scalable AI pipelines combining LLMs, knowledge graphs, NLP, semantic retrieval and recommender systems for explainable expert matching.
- Fine-tuned T5 on the SciTLDR scientific summarization dataset and integrated generated summaries into downstream LLM and retrieval experiments.
- Implemented research workflows in Python with PyTorch, Hugging Face, Ollama/OpenAI APIs, NetworkX/Node2Vec and reproducible JSON-based data pipelines.

Earlier experience:

- Industrial & Quality Control Engineer, Data Analyst and Marketing roles | 2009–2022

Technical Skills

GenAI & Agents

LLMs, RAG, AI Agents, LangChain, LangGraph, LLM-as-a-Judge, Prompt Engineering, LLM Evaluation, Multi-Model Pipelines, PEFT (LoRA,QLoRA)

ML / NLP

PyTorch, Hugging Face Transformers, scikit-learn, SBERT, T5, NLTK

Engineering

Python, FastAPI, OpenAI API, Docker, AWS, Google Colab, Ollama, OpenRouter, SQL, JSON, Git, CI/CD

Knowledge & Retrieval

Knowledge Graphs, Vector Databases (ChromaDB), Embeddings, Semantic Search, Reranking, Node2Vec, OpenIE, GLiNER, CSO Classifier, TF-IDF

Education

University of Cagliari — 2022 – Feb 2026

PhD in Mathematics and Computer Science

Research Focus: Grounding LLMs in Structured Data, AI, knowledge graphs, NLP, Recommender Systems

Dokuz Eylül University — 2019 – 2022

M.Sc. in Industrial Engineering

Research Focus: Machine Learning and Data Mining

Azad University — 2009 – 2014

B.Sc. in Industrial Engineering

Selected Publications

LLM-Assisted Reviewer Assignment via Auditable Expertise Matching - IEEE Access (2026)

Reviewer Matching with LLMs: A Keyword-Driven, Interpretable Framework - International Journal on Digital Libraries (2026)

Leveraging Knowledge Graphs and LLMs for Content-Based Reviewer Assignment - Intelligent Information Systems (2025)

Additional publications available on request.
