

Farid Bagheri

GENAI & AGENTIC AI ENGINEER | LLMs · RAG · AI Agents · Knowledge Graphs · AI Evaluation

PhD AI Engineer specializing in LLMs, agentic AI, RAG and knowledge-enhanced systems. Experienced in designing multi-model LLM pipelines, auditable evaluation workflows, semantic retrieval systems and knowledge-graph-based AI using Python, PyTorch, Hugging Face and LangChain. Built and evaluated scalable AI systems for real-world data and engineering-oriented workflows, combining research rigor with prior manufacturing quality and data-analysis experience.

Experience

Mercor Remote
AI & Prompt Engineer | LLM Evaluation 2025 - Present

- Evaluate and compare LLM outputs for factual accuracy, relevance, coherence and instruction compliance.
- Identify hallucinations, reasoning/response-quality failures and gaps between expected and generated outputs.
- Refine prompts and provide structured evaluation feedback to improve model reliability and response quality.

Sorbonne Paris Nord University (LIPN) France
Research Associate | LLMs, Agents & Knowledge-Enhanced AI 2023 - Present

- Design modular agentic-AI workflows with multi-model producer/judge architectures, structured JSON outputs, deterministic post-processing and auditable intermediate artifacts.
- Develop knowledge-enhanced retrieval and semantic-matching workflows using LLMs, knowledge graphs, SBERT, TF-IDF, graph embeddings and hybrid reranking/similarity methods.
- Benchmark multiple LLM families for output quality, robustness and downstream retrieval performance using automated and task-specific evaluation metrics.
- Build reproducible experiments on a real-world corpus of 663 submissions and 524 expert profiles sourced from linked structured and unstructured data.

University of Cagliari Italy
PhD Researcher - Artificial Intelligence 2022 - Feb 2026

- Developed scalable AI pipelines combining LLMs, knowledge graphs, NLP, semantic retrieval and recommender systems for explainable expert matching.
- Fine-tuned T5 on the SciTLDLDR scientific summarization dataset and integrated generated summaries into downstream LLM and retrieval experiments.
- Implemented research workflows in Python with PyTorch, Hugging Face, Ollama/OpenAI APIs, NetworkX/Node2Vec and reproducible JSON-based data pipelines.

Sorbonne Paris Nord University France
Graduate Lecturer 2024 - Present

- Teaching NLP, Knowledge Graphs, Machine Learning & Deep Learning courses

Sanem Plastik Company Turkey
Quality Control Engineer & Data Analyst 2019 - 2022

- Analyzed production-line quality data to identify performance issues, estimate production costs and quantify potential savings.
- Collaborated with manufacturing and management teams to improve quality, production and design standards.

Earlier experience:

- Industrial Engineering and Marketing roles, Iran | 2009–2013

Technical Skills

GenAI & Agents

LLMs, RAG, AI Agents, LangChain, LangGraph, LLM-as-a-Judge, Prompt Engineering, LLM Evaluation, Multi-Model Pipelines, LoRA/PEFT familiarity

ML / NLP

PyTorch, Hugging Face Transformers, scikit-learn, SBERT, T5, NLTK

Engineering

Python, FastAPI, Flask, REST APIs, OpenAI API, Ollama, OpenRouter, SQL, JSON, Git, CI/CD

Knowledge & Retrieval

Knowledge Graphs, Vector Databases (ChromaDB), Embeddings, Semantic Search, Reranking, NetworkX, Node2Vec, OpenIE, GLiNER, CSO Classifier, TF-IDF

Education

University of Cagliari 2022 -Feb 2026

PhD in Mathematics and Computer Science
Research Focus: Grounding LLMs in Structured Data, AI, knowledge graphs, NLP, Recommender Systems

Dokuz Eylül University 2019 - 2022

M.Sc. in Industrial Engineering
Research Focus: Machine Learning and Data Mining

Azad University 2009 - 2014

B.Sc. in Industrial Engineering

Selected Publications

LLM-Assisted Reviewer Assignment via Auditable Expertise Matching

IEEE Access - 2026

Reviewer Matching with LLMs: A Keyword-Driven, Interpretable Framework

International Journal on Digital Libraries - 2026

Leveraging Knowledge Graphs and LLMs for Content-Based Reviewer Assignment

Intelligent Information Systems (Springer)- 2025

Additional publications available on request.
